

Flipkart Web Scrapping

Scraping Shoes Data from Flipkart using Python & BeautifulSoup

 College: Jai Parkash Mukand Lal Innovative Engineering & Technology Institute

 Company Name: Codroidhub

Project Overview

This notebook demonstrates end-to-end **web scraping** of Flipkart's shoes catalog using **Python**, **Requests**, and **BeautifulSoup**. We send an HTTP request with custom headers, parse the HTML response, extract product data (titles, prices, discounts), and export it to a structured **CSV file**.

1. Import Libraries

2. Request URL

3. Parse HTML

4. Extract Data

5. Export CSV

STEP 1 — Import Libraries

Load all required Python packages for scraping and data handling

BeautifulSoup — Parses and navigates HTML/XML documents

pandas — Creates DataFrames and exports data to CSV

requests — Sends HTTP requests to the Flipkart server

```
In [1]: from bs4 import BeautifulSoup
import pandas as pd
```

```
In [2]: import requests
```

STEP 2 — Request the URL

Send an HTTP GET request to Flipkart with browser-like headers to avoid blocking

Why custom headers? Flipkart blocks plain Python requests. We spoof a `User-Agent` string to mimic a real browser so the server returns the full product listing page.

```
In [ ]: url = "https://www.flipkart.com/search?q=shoes&as=on&as-show=on&otracker=AS_Que
response = requests.get(url)
headers = {
    'user-Agent': 'Mozilla/5.0(Windows NT 10.0; Win64; v64) AppleWebKit/537.36
}
response = requests.get(url, headers=headers)
```

```
In [ ]: response
```

```
Out[ ]: <Response [200]>
```

Status Code 200 – Request successful! Flipkart returned the page.

```
In [4]: response.status_code
```

```
Out[4]: 200
```

STEP 3 — Parse HTML with BeautifulSoup

Convert the raw HTML response into a searchable tree structure

We use `html.parser` (Python's built-in parser) to create a navigable `BeautifulSoup` object from the raw page content. This lets us query elements by tag, class, or attribute.

```
In [5]: soup = BeautifulSoup(response.content, 'html.parser')
soup
```

```

,"walletFAQ": "\_\_What is PhonePe? What payment options does PhonePe provide?\_\_\n\n PhonePe is a new mobile payment solution. Our goal is to make digital payments so easy and safe that people never have to carry cash or cards again! You can use PhonePe as a wallet or directly make transfers through your linked bank account using UPI. It's safe, easy and instant, you have to use it to believe it!\n\n\_\_What is UPI? What is the advantage of UPI transfers over wallets?\_\_\n\n 'Unified Payment Interface' (UPI) is an instant payment system that allows you to transfer money directly from your bank account. The best part about UPI is that it allows you to make payments with a few clicks without the hassle of sharing bank a/c details or typing your card details, net banking password, OTP, etc. There are many advantages of UPI. The main advantage is that you don't have to block your money by loading it into a wallet. Simply link your bank account and then you can make seamless payments without having to worry about topping up a wallet, wallet spend limits or not earning interest on your money. Makes sense to use UPI for direct bank transfer rather than the plethora of wallets, doesn't it? \n\n\_\_Can I transfer funds from PhonePe wallet? If yes, how much can be transferred?\_\_\n\n Yes, you can transfer funds from PhonePe wallet to your bank account using the Bank Account Number and Branch IFSC Code. You can transfer a maximum of ₹5,000 in a single transaction and a maximum of ₹25,000 in a month.\n\n\_\_Can I use an International phone number to activate PhonePe wallet?\_\_\n\n No, currently PhonePe wallet is available only for domestic mobile numbers."

,"savedCardFAQ": "\_\_Why is my card being tokenised?\_\_\n\nAs per the new RBI guidelines to make card data more secure, merchants like Flipkart cannot store the card details of users. As an alternative, RBI has authorised card networks and card issuers to offer card tokenisation services, which means the replacement of actual credit and debit card details with an alternate code called "token". The user can either choose to tokenise their card by giving consent for future transactions or choose to continue without tokenisation.\n\n\_\_What is a token?\_\_\n\nA token is generated

rated when a user gives consent to Flipkart to tokenise their card. A token is a unique value for a combination of card, token requestor (Flipkart is a token requestor & accepts request from the customer for tokenisation of a card and passes it onto the card network to issue a corresponding token) and device. The token does not contain any personal information linked to your card and is generated only when a customer uses a new card for a successful transaction on Flipkart.

\_\_Is it safe to tokenise my card?\_\_

Yes. A tokenised card transaction is considered safer as the actual card details are not shared with the Flipkart during transaction processing. Card information is stored with the authorised card networks or card issuers only and Flipkart does not store your 16-digit card number.

\_\_Is tokenisation of card mandatory?\_\_

No, customer can choose whether or not to tokenise their card.

\_\_What happens if I don't give consent to secure my card?\_\_

If you don't give consent to tokenise your card, you need to enter your card details for every transaction as stipulated under the RBI guidelines.

,"savedVpaFAQ": "\_\_Why is my UPI being saved on Flipkart?\_\_

It's quicker. You can save the hassle of typing in the complete UPI information every time you shop at Flipkart by saving your UPI details. You can make your payment by selecting the saved UPI ID of your choice at checkout. While this is obviously faster, it is also very secure.

\_\_Is it safe to save my UPI on Flipkart?\_\_

Absolutely. Your UPI ID information is 100 percent safe with us. UPI ID details are non PCI compliant and are non confidential data.

\_\_What all UPI information does Flipkart store?\_\_

Flipkart only stores UPI ID and payment provider details. We do not store UPI PIN/MPIN.

\_\_Can I delete my saved UPI?\_\_

Yes, you can delete your UPI ID at any given time.

PhonePe is a new mobile payment solution. Our goal is to make digital payments so easy and safe that people never have to carry cash or cards again! You can use PhonePe as a wallet or directly make transfers through your linked bank account using UPI. It's safe, easy and instant, you have to use it to believe it!

**What is UPI? What is the advantage of UPI transfers over wallets?**

'Unified Payment Interface' (UPI) is an instant payment system that allows you to transfer money directly from your bank account. The best part about UPI is that it allows you to make payments with a few clicks without the hassle of sharing bank a/c details or typing your card details, net banking password, OTP, etc. There are many advantages of UPI. The main advantage is that you don't have to block your money by loading it into a wallet. Simply link your bank account and then you can make seamless payments without having to worry about topping up a wallet, wallet spend limits or not earning interest on your money. Makes sense to use UPI for direct bank transfer rather than the plethora of wallets, doesn't it?

**Can I transfer funds from PhonePe wallet? If yes, how much can be transferred?**

Yes, you can transfer funds from PhonePe wallet to your bank account using the Bank Account Number and Branch IFSC Code. You can transfer a maximum of ₹5,000 in a single transaction and a maximum of ₹25,000 in a month.

**Can I use an International phone number to activate PhonePe wallet?**

**savedCardFAQ: Why is my card being tokenised?**

As per the new RBI guidelines to make card data more secure, merchants like Flipkart cannot store the card details of users. As an alternative, RBI has authorised card networks and card issuers to offer card tokenisation services, which means the replacement of actual credit and debit card details with an alternate code called "token". The user can either choose to tokenise their card by giving consent for future transactions or choose to continue without tokenisation.

**What is a token?**

A token is generated when a user gives consent to Flipkart to tokenise their card. A token is a unique value for a combination of card, to ken requestor (Flipkart is a token requestor & accepts request from the customer).

r for tokenisation of a card and passes it onto the card network to issue a corresponding token) and device. The token does not contain any personal information linked to your card and is generated only when a customer uses a new card for a successful transaction on Flipkart.

\_\_Is it safe to tokenise my card?\_\_

Yes. A tokenised card transaction is considered safer as the actual card details are not shared with the Flipkart during transaction processing. Card information is stored with the authorised card networks or card issuers only and Flipkart does not store your 16-digit card number.

No, customer can choose whether or not to tokenise their card.

\_\_What happens if I don't give consent to secure my card?\_\_

If you do not give consent to tokenise your card, you need to enter your card details for every transaction as stipulated under the RBI guidelines.

## STEP 4 — Extract Product Data

Locate all shoe product cards and pull out Title, Price & Discount

### Find All Product Cards

Each shoe listing on Flipkart is wrapped in a `<div>` with class `nZIRY7`. We use `find_all()` to grab all of them at once.

```
In [7]: shoes = soup.find_all('div', class_ = 'nZIRY7')
shoes
```

```
